AD

**Ad nauseam : a survivor's guide to American consumer culture /**  
edited by Carrie McLaren and Jason Torchinsky. -- 1st ed. -- New  
York : Faber and Faber, c2009.

SUMMARY: McLaren and Torchinsky (Stay Free! magazine) provide a loose collection of essays and interviews to critique various aspects of American consumer culture. Two of the more thought-provoking entries are Julie Scelfo's (Newsweek) interview with NYU law professor Richard Sherwin on how television legal dramas shape expectations of jurors, and a debate between SutJhally (communications, Univ. of Massachusetts-Amherst) and James Twichell (English & advertising, Univ. of Florida-Gainesville) about the relative merits and demerits of advertising. There are some interesting pieces from inside the world of advertising, such as one on how holidays like "National Denim Day" and "National Private Investigators' Day" came to be, and others related to how magazine media kits try to attract ad revenue. VERDICT Readers familiar with Stay Free! magazine will recognize that, while some notable original essays are included in this book, many of them, as well as fake advertisements, are reprints of material freely available on Stay Free!'s web site (www.stayfreemagazine.org). The book will appeal to readers with an ironic sense of humor or a general suspicion of consumerism as well as those who enjoy keeping track of popular culture.- Elizabeth L. GOL**      **Ecological intelligence : how knowing the hidden impacts of what we buy can change everything / Daniel Goleman.** -- 1st ed. -- New York : Broadway Books, c2009.

SUMMARY: "Ecological Intelligence recasts the uproar over global warming and the assault of man-made toxins into our bodies in terms of the collective self-deception which both created this crisis and holds a key to its solution. Ecological Intelligence argues that "green" labels and recycling programs may do more harm than good by feeding a vital lie, lulling us into the illusion that we are doing enough already while ignoring the adverse impact of the far vaster proportion of what we buy and do. The book brings a psychologist's insights into the world of commerce, . . . -- tracking every substantial impact over the life cycle of an item, from manufacture to daily use, to disposal . . ." **The natural history of unicorns** / Chris Lavers. -- 1st U.S. ed. -- New York : William Morrow, c2009.

SUMMARY: "Where did the unicorn come from and how was it accepted for so long as a part of the animal kingdom? Chris Lavers argues that although the unicorn of our imagination isn't real, traces of its character can be found in existing species. In this lively and vivid exploration of the natural world, Lavers follows the beast's trail to the plateaus of India and into the jungles of Africa to unearth the flesh and blood ancestors of our iconic unicorn-and, along the way, he introduces the peoples, historians, explorers, traders, and scientists who steadfastly believed." SUMMARY: " Using computer-generated three-dimensional images, graphics, and clear explanatory text presented in brief sections, the follow-up to The Human Body Book (2007) examines each aspect of the brain's structure and functions. Carter covers both the physiological and psychological aspects of the brain and more than 50 brain-related disorders as well as providing a comprehensive, layered brain atlas. Sections on brain function treat topics such as Movement and Control, The Social Brain, and Memory. A glossary provides definitions of medical and other terms, and an index aids navigation for readers looking for specific topics. A time line of investigation into the brain and a two-page spread on Landmarks in Neuroscience help readers put their newly gained knowledge into context. The highlight of the volume is the illustrations. Pages are full of color photographs, charts, diagrams, and other graphics, including specially commissioned brain scans." SUMMARY: "Cory Friedman woke up one morning when he was five years old with the uncontrollable urge to twitch his neck. From that day forward his life became a hell of irrepressible tics and involuntary utterances, and Cory embarked on an excruciating journey from specialist to specialist to discover the cause of his disease. Soon it became unclear what tics were symptoms of his disease and what were side effects of the countless combinations of drugs. The only certainty is that it kept getting worse. This is the true story of Cory and his family's decades-long battle for survival in the face of extraordinary difficulties and a maddening medical establishment."

\*Starred Review\* Chloe Hobbs, owner of a popular knitting shop, is unique in the tiny hamlet of Sugar Maple, Vermont. Not only is she the mayor but she is also half human. Everyone else is of the supernatural ilk. The sole full human is the town sheriff, Chloe's boyfriend, Luke MacKenzie. Chloe comes from a long line of sorceresses whose main function is to protect the little village and all its inhabitants. She has finally defeated Isadora, the powerful, evil, supreme Fae, and has banished her into another world (Casting Spells, 2008). But Isadora doesn't appreciate her life in exile, and in this book, she fights back with a vengeance, even taking the spirit of Luke's deceased daughter, Stephanie, hostage. Now Chloe has to choose. Does she keep Isadora imprisoned and save Sugar Maple, or does she let Isadora go free and save the little girl's soul? There's no such thing as an easy choice in this poignant, magical story of love and sacrifice. Bretton spins an incredible tale. The next book in this series can't come fast enough.--Mosley, Shelley Copyright 2009 Booklist "

Brooks, Terry.

**Armageddon's children** / Terry Brooks. -- 2007 Del Rey Books mass market ed. -- New York : Del Rey/Ballantine Books, 2007, c2006. -- ( Genesis of Shannara)

SUMMARY: "... Set on Earth some 80 years from now, it is the first volume in an untitled pre-Shannara series that continues the story of the author's "Word/Void" trilogy (Del Rey). The Earth has been ravished by ecological disasters and demons, and once-men and horrible mutated monsters roam the planet. Any remaining humans are holed up in fortresses, except for the outcasts and the unwanted street children, including a group called the Ghosts, who have formed tribes to survive. Logan Tom and Angel Peres, who are Knights of the Word, have been recruited by The Lady to save and protect the gypsy morph, the offspring of Nest Freegard, previously featured in the trilogy. ... the ending is literally a cliff-hanger, and readers may find it difficult to wait patiently for the next volume of this sure-to-be popular series.- Jane Halsall, McHenry Public Library District, IL Copyright 2006 Reed Business Information. **School Library Journal** ( August 01, 2006 ; [0-345-48408-8](#) )

**COL**      **The vampire of Venice Beach : a novel** / Jennifer Colt. -- 1st ed. --  
New York : Broadway Books, c2006.

SUMMARY: "Colt's lovable detective duo, redheaded twins Kerry and Terry McAfee, last seen in *The Mangler of Malibu Canyon* (2006), find themselves on security duty for a group of vampire wannabes at the Venice Goth Parade. The last thing they expect is to end up with an actual dead body on their hands, but that's precisely what happens when the coffin they're carrying opens up to reveal a very dead Queen of the Undead. Ephemera--or Darby Applewhite as the twins knew her in high school--appears to be missing a fatal amount of blood, and tooth marks on her neck suggest the work of vampires. Unwilling to leave the investigation to the police, the McAfee twins question a bevy of suspects, including Darby's fellow goth roommates and a truly frightening rival. But when Darby's body disappears, the twins start to suspect she might not be dead after all. Colt's enjoyably fun series holds up well in its third installment and will have mystery lovers reading rapidly to reach the exciting conclusion. --Kristine Huntley Copyright 2007 Booklist" ((BooksInPrint Online))

**FIC**  
**DER**      **Twins** / Marcy Dermansky. -- 1st ed. -- New York : William Morow,  
c2005.

SUMMARY: "A beguiling story of the powerful ties between identical twins, Dermansky's lively debut also takes on bulimia, lesbian relationships, and the pressures of high-school academics and sports. In the alternating voices of Chloe, who is four minutes older, taller, smarter, and prettier, and Sue, who is always playing catch-up, Dermansky weaves the ever--changing story of the twins' lives from eighth grade through high school. Sue becomes obsessive

about their twinship when they reach ninth grade, and as Chloe tries to distance herself, Sue shaves her head and falls into bulimia. Chloe becomes a basketball phenom and seems headed for a college scholarship until their divorce-lawyer parents decide they're tired of parenting, and consign the girls to the care of their older brother. Gradually the girls trade emotional places: Chloe becomes the free-spirited party girl while Sue feels proud of her normality. I ate regular meals. I had regular periods. I never threw up. With the ability to blend humor with these sometimes sad and lonely lives, Dermansky has crafted a memorable novel. --Deborah Donovan Copyright 2005 Booklist" **Booklist**( August 01, 2005 ; [0-06-075978-X](#) )

**Dragon's fire** / Anne McCaffrey, Todd McCaffrey. -- 2007 Del Rey mass market ed. -- New York : Del Rey/Ballantine Books, 2007, c2006.

SUMMARY: "Gr 7 Up-The McCaffreys return to Pern. The story is set in the same time period as Dragon's Kin (Del Rey, 2003), the second Interval after landing, but has a different focus. The colonists are preparing for the next 50-year pass of the Red Star and the start of Thread, a mindless killer that falls from the skies destroying all organic material in its path. To combat this threat, the dragons must chew firestone to burn Thread from the sky. However, the mining of the firestone is difficult-any drop of moisture makes it explode, and it has killed countless dragons and miners. The other problem is what to do with the Shunned. They are holders who have committed crimes that have banished them from the holds but with Thread coming, they will die if they are holdless. The story is brought to life by a mute harper's apprentice, Pellar, and a miner's son, Cristov, who take it upon themselves to save the Shunned and the dragonriders alike. This novel reintroduces readers to well-known characters such as Kindan and Master Zist and introduces new characters and concepts of the world of Pern. SUMMARY: "Young Kindan has no expectations other than joining his father in the mines of Camp Natalon, a coal mining settlement struggling to turn a profit far from the great Holds where the presence of dragons and their riders means safety and civilization. Mining is fraught with danger. Fortunately, the camp has a watch-wher, a creature distantly related to dragons and uniquely suited to specialized work in the dark, cold mineshafts. Kindan's father is the watch-wher's handler, and his son sometimes helps him out. But even that important job promises no opportunity outside the mine." "Then disaster strikes. In one terrible instant, Kindan loses his family and the camp loses its watch-wher. Fathers are replaced by sons in the mine - except for Kindan, who is taken in by the camp's new Harper. Grieving, Kindan finds a measure of solace in a burgeoning musical talent ... and in a new friendship with Nuella, a mysterious girl no one seems to know exists. It is Nuella who assists Kindan when he is selected to hatch and train a new watch-wher, a job that forces him to give up his dream of becoming a Harper; and it is Nuella who helps him give new meaning to his life." "Meanwhile, sparked by the tragedy, long-simmering tensions are dividing the camp. Far below the surface, a group of resentful miners hides a deadly secret. As warring factions threaten to explode, Nuella and Kindan begin to discover unknown talents in the misunderstood watch-wher - talents that could very well save an entire Hold. During their time teaching the watch-wher, the two learn some things themselves: that even a seemingly impossible dream is never completely out of reach ... and that light can be found even in the deepest darkness."--BOOK JACKET.

**Seeker** / Jack McDevitt. -- Ace mass-market ed. -- New York : Ace Books, [2006], c2005.

SUMMARY: "McDevitt's latest gripping novel of future history begins in the late twentieth century, when a technological breakthrough costs the lives of its discoverers. Then it jumps seven centuries forward, to the beginning of interstellar flight and some of the first refugees from Earth. Finally, it moves into the very far future and to the seeker of the title, one of several looking for inhabited worlds that are the results, however longterm, of events recorded earlier. McDevitt is now being compared, quite legitimately, to Arthur C. Clarke, and not only because he has a similar kind of grand vision of the human future among the stars. He also has characters with amiable, or not-so-amiable, quirks, who in the middle of deciphering the secrets of lost races take time to worry about where to get a good meal in the next

town. One of these days McDevitt is going to receive an actual and well-deserved big award to go with his professional stature. --Roland Green Copyright 2005 Booklist" (November 01, 2005)

**NYL**      **Mortal coils** / Eric Nylund. -- 1st ed. -- New York : Tor, c2009.

SUMMARY: "Orphaned twins Eliot and Fiona have been raised by a repressive grandmother, whose more than 100 rules have assured that nothing interesting has ever happened in their lives. But when they turn 15, a surprise visit from an uncle brings the revelation that their parents are a goddess and Lucifer, Prince of Darkness. The twins, whose supernatural powers are just emerging, become sacrificial pawns when the league of the gods sets up three heroic trials to test their worthiness to stay alive and join the family. Meanwhile, the Infernals, or fallen angels, determine to learn whether the twins belong with them by tempting them three times; to pass this test, they must survive all three enticements. A hair-raising tale ensues, in which the twins' powers grow as they face the six life-or-death ordeals. The immortals are shadowy yet dimensional characters, but the finely crafted characterizations of the twins sustain the story. The ending encourages thinking a sequel may be coming. Suggest this as a read-alike for Mark J. Ferrari's *The Book of Joby* (2007).--Estes, Sally Copyright 2009 Booklist" ( February 15, 2009 ; [0-7653-1797-4](#) )

**ODE**      **Coal Run** / Tawni O'Dell. -- New York : New American Library, c2005.

SUMMARY: "Coal Run is a community of ghosts and memories. After a mining explosion took the lives of so many men and transformed their families, the reverberations are still being felt in the generation of survivors thirty years later. Narrator Ivan Zoschenko, the local deputy and erstwhile football legend ("the Great Ivan Z"), his pro career sidelined by a knee injury, spends a week seemingly preparing for an old teammate's imminent release from prison. In doing so, Ivan introduces a rich cast of characters - his unexpectedly wise and comic former beauty queen sister, his former idol Val Claypool, and the young woman whose life he changed forever. And during the events of this week, Ivan confronts his demons and reveals himself to be a man whose conscience is burdened by a long-held and shocking secret that must be reckoned with."--BOOK JACKET.

-- New York : Atria Books, c2010.

SUMMARY: **Booklist** ( December 15, 2009 ; [0-7432-9643-5](#) )

"The prolific Picoult crafts a cunning whodunit that explores what it's like to be not only a teenager with Asperger's syndrome but also an AS kid accused of murder. Congenitally incapable of interpreting common social behavior or properly expressing his feelings, Jacob Hunt takes refuge in Crimebuster reruns and forensic science, often to the chagrin of the local cops. When the badly battered corpse of Jacob's social-skills tutor, grad student Jess Ogilvie, is finally discovered, police first suspect Jess' hot-tempered boyfriend. But when TV news footage shows Jess' body wrapped in Jacob's favorite quilt, his mother, Emma, reluctantly realizes her son might somehow be involved. After Jacob's arrest, legal machinations go toe to toe with medical ethics, while Emma never realizes that Jacob's younger brother, Theo, is struggling to conceal his own dangerous secret, one that will directly impact the outcome of Jacob's trial. Told from multiple viewpoints, including those of an empathetic detective and an eager but wet-behind-the-ears attorney, the mystery unfolds at a spellbinding pace. But Picoult also does an exceptional job communicating the complexities of Asperger's syndrome and the challenges confronting AS families. Faithful Picoult fans will whisk this off the shelves, but devoted readers of savvy courtroom dramas should also give it a try.--Haggas, Carol

**My Jim : a novel** / Nancy Rawles. -- 1st pbk. ed. -- New York : Three  
Rivers Press, c2006.

SUMMARY: "...[a] spin-off of Twain's classic gives the resilient Sadie Watson a harrowing story...: "...a haunting and inspiring story about freedom, longing, and the remarkable endurance of love." "To help her granddaughter accept the risks of loving, Sadie Watson mines her memory for the tale of the unquenchable love of her life, Jim. Sadie' s Jim was an ambitious young slave and seer who, when faced with the prospect of being sold, escaped down the Mississippi with a white boy named Huck Finn. Sadie is suddenly left alone, worried about her children, reviled as a witch, punished for Jim' s escape, and convinced her husband is dead. But Sadie' s will and her love for Jim animate her life and see her through. Told with spare eloquence and mirroring the true stories of countless slave women, "My Jim" recreates one of the most controversial characters in American literature. A nuanced critique of the great American novel, "My Jim" is a haunting and inspiring story about freedom, longing, and the remarkable endurance of love. **Ancestor : a novel** / Scott Sigler. -- 1st ed. -- New York : Crown Publishers, c2010.

Summary: "The ancestors are out there, you have to believe me." From acclaimed author Scott Sigler-New York Times bestselling creator of *Infected* and *Contagious*-comes a tale of genetic experimentation's worst nightmare come true. Every five minutes, a transplant candidate dies while waiting for a heart, a liver, a kidney. Imagine a technology that could provide those life-saving transplant organs for a nominal fee ... and imagine what a company would do to get a monopoly on that technology. On a remote island in the Canadian Arctic, PJ Colding leads a group of geneticists who have discovered this holy grail of medicine. By reverse-engineering the genomes of thousands of mammals, Colding's team has dialed back the evolutionary clock to re-create humankind's common ancestor. The method? Illegal. The result? A computer-engineered living creature, an animal whose organs can be implanted in any person, and with no chance of transplant rejection. There's just one problem: these ancestors are not the docile herd animals that Colding's team envisioned. Instead, Colding's work has given birth to something big, something evil. With these killer creatures on the prowl, Colding and the woman he loves must fight to survive - even as government agents close in to shut the project down, and the deep-pocketed company backing this research proves to have its own cold-blooded agenda. As the creators become the prey in the ultimate battle for survival, Scott Sigler takes readers on the ultimate thrill-ride-and offers a chilling cautionary account of what can happen when hubris, greed, and madness drive scientific experimentation past the brink of reason. **The Grays** / Whitley Strieber. -- 1st mass market ed. -- New York : Forge, 2007, c2006.

SUMMARY: "We are not alone. Millions of people are confronting aliens that authorities say do not exist. Whitley Strieber--author of the legendary, #1 bestselling book "Communion," which detailed his own close encounters--now returns to the riddle of aliens with "The Grays," Drawing from a lifetime of research and his own experiences, Strieber offers up a fictional account of the conspiracy behind the alien presence on Earth while also giving us a startling look inside the alien mind that will astound, frighten, and enthrall readers. Meet the Three Thieves, a group of Grays assigned to duty in a small Kentucky town. They have been preparing a child for generations. Innocent Conner Callaghan will face the ultimate terror as he struggles to understand who he has been bred to become, and what he must do to save humanity. Meet Colonel Michael Morax, who strives to keep the secret of the Grays from the public for reasons so sinister, yet believable, that they read like truth . . . and very well may be. And then there's Lauren Glass, government "empath" to the last surviving captive Gray, known only as B for Bob. Her unique talent to communicate with this captive Gray may be the only way humans can unravel their ultimate plan. But when B for Bob suddenly escapes the highly secure underground Air Force facility that he's been captive in for years, it triggers a mass undertaking in that small Kentucky town. A frantic race begins, as the government must outmaneuver the Grays to keep the secret of the presence intact. "The Grays" is a mind-bending journey behind the curtain of secrecy that surrounds the subject of aliens, written by the field's great master. " (BooksInPrint Online)

SUMMARY: "In The Cat's Pajamas we are treated to a treasure trove of Bradbury gems old and new -- eerie and strange, nostalgic and bittersweet, searching and speculative -- all but two of which have never been published before. " (BooksInPrint Online) " . . . Stories range from the lighthearted, romantic tug-of-war in the title's namesake to more sinister, stomach-churning fare. Some of the characters are decent, while others are dastardly; they are confused, young, withered, or wily. Each piece has a haunting, Twilight Zone quality. The author's introduction gives readers insight into his thought processes as he reaches into dark recesses, doles out social justice, and bandies about far-out plots like the President of the United States having to win back the country in a card game with American Indians. Unpublished tales from decades ago and those written in the 21st century all carry Bradbury's unmistakable edginess.-Karen Sokol, Fairfax County Public Schools, VA Copyright 2005 Reed Business Information."
